SUMMARY

I'm a Front-End turned Full-Stack developer with 4 years of experience developing web applications. With my expertise, I've helped individuals or businesses develop robust web applications that are easy to use and intuitive. I've also used my experience as a DevOps engineer to streamline my workflow so that I can push features faster with fewer bugs.

WORK EXPERIENCES

Front-End Web Developer Dec 2021 — Apr 2024
TrustIQ *Jakarta, Indonesia (Remote)*

- Maintained a webview-based application using React.
- Maintained a web-based back office application using React and Angular.
- Translated client requirements into fully usable features.
- Collaborated with the back-end developers to integrate API calls.
- Developed a UI element that is reusable and easy to maintain.

FREELANCE PROJECTS

Full-Stack Web Developer, KSB Day Care Dashboard (daycare.sims-it.biz.id) Sept 2024 — Present

- Used Ruby on Rails to develop a web-based dashboard for managing children registrations and daycare data.
- Added translation (i18n) for Indonesian and English languages.
- Developed an API for mobile application.
- Created an API documentation using Swagger.
- Used Docker Compose to build an application that can be deployed in any environment.
- Used CloudKilat VPS to deploy the application to a staging environment.

Front-End Web Developer, KLN HRIS Oct 2022 — Present

- Developed a web-based HRIS application using React, TypeScript, and MUI components.
- Managed user's permission using CASL.
- Used CASL to restrict which page a user could view.

Full-Stack Web Developer, Idebku Jan 2025 — Feb 2025

- Using ASP.NET Core to query data from database.
- Using ASP.NET MVC to create a view for those data.

Front-End Web Developer, ROCA Pro (m.rocapro.id) May 2024 — Aug 2024

- Developed a mobile-first web application using Remix, TypeScript, and MUI components.
- Transformed a UI/UX design from Figma into reusable and easy-to-maintain UI elements.

Front-End Web Developer, WMS Praisindo Aug 2023 — Mar 2024

- Developed and maintained a React-based micro front-end web application.
- Transformed a UI/UX design from Figma into reusable and easy-to-maintain UI elements.

Full-Stack Web Developer, Dinas Pariwisata Pangkep Dec 2021 — Dec 2021

- Developed a web-based application using React, TypeScript, and Tailwind CSS.
- Used Figma to create a simple wireframe.
- Added DatoCMS as a data source to the application.

Front-End Web Developer, PAK Dosen Kedokteran Universitas Hasanuddin Mar 2021 — Nov 2021

- Developed and designed a web-based PAK reporting application using React and MUI components.
- Added a feature to export complex nested data to a PDF, which is then compiled into an easy-to-read table.

PROJECTS

Developer, Basic CI/CD Pipeline (github.com/mbishram/simple-python-pyinstaller-app) Jan 2025 — Jan 2025

- Developed a simple CI/CD pipeline for a Python application.

- Tech Stack: Terraform, GCP, Jenkins, Prometheus, Grafana, Docker.

Developer, Cuberto's Fluid Card (cuberto-fluid-card.vercel.app)   Jul 2021 — Jul 2021
- Developed a web-based fluid card animation that are inspired from Cuberto.
- Tech Stack: React, AnimeJS, Tailwind CSS, Typescript.

EDUCATION

Universitas Hasanuddin   Makassar, Indonesia
Bachelor in Informatics Engineering   *Aug 2017 — Dec 2023*
- GPA: 3.60/4.0 (Transcript)
- Thesis: Improving Web Application Security by Storing JSON Web Token in Local Variable

CERTIFICATIONS

Belajar Implementasi CI/CD, Dicoding (dicoding.com/certificates/RVZK1643EPD5)   Jan 2025

Belajar Back-End Pemula dengan JavaScript, Dicoding (dicoding.com/certificates/JMZV48JJNXN9)   Nov 2024

Menjadi Front-End Web Developer Expert, Dicoding (dicoding.com/certificates/1RXYEOMV9ZVM)   Jul 2021

SKILLS

- **Programming Languages**: JavaScript, TypeScript, Ruby, C#
- **Technologies**: React, NextJs, Remix, SASS, Bootstrap, Tailwind, Pug/Jade, Angular, Ruby on Rails, Docker, Jenkins, Terraform, GCP, AWS
